

CFC Applications Available

The Combined Federal Campaign (CFC) is now accepting agency applications for the 2010 campaign.

An agency can download either the local independent organization or the local federation application. A federation is a group of voluntary charitable human health and welfare organizations created to supply common fundraising, administrative and management services to its members. A federation must have at least 15 member organizations that individually meet all of the CFC eligibility criteria. If the organization does not have 15 member organizations, it must apply as an independent organization using the independent organization application. FSYA is an organization that operates on a military base for the benefit of the members of the military who work or live on that installation or day-care centers that are located in a Federal facility. Deadline for submitting an application is March 26, 2010.
